## Diora Kimya

By producing traditional handmade Olive Oil Soaps, our company started its journey as a family owned business in 1964. Our company took the steps of corporate restructuring in 2014 and named as “Diora Kimya”. Today, running by the 3rd generation of the family, Diora Kimya is producing over 100 different soap and cosmetic products under 5 brands. And, we proudly serve our products to over 50 countries including US, Canada, Japan, Russia, Ukraine, UK and many other European, Middle Eastern, African, South and Central American countries. Diora Kimya’s heritage, history, expertise, innovative formulations and use of finest ingredients has enabled us to provide high quality products for affordable and excellent value to our business partners.

## Traditionally Crafted By Soap Masters

We are one of the few artisan soap makers left in the world still producing natural cauldron cooked and sundried olive oil soaps. We use only 3 ingredients: olive oil, sodium chloride and water to make this amazing soap. LOLE'S Sundried Olive Oil Soaps are produced by using traditional methods with vitamin rich olives harvested from the Mediterranean and Egean region of Turkey. Our olive oil soaps are authentic cauldron cooked, crafted, hand cut and sundried to form the best olive oil soaps in the world. Today, with the advanced development in chemistry and machinery, bar soaps usually take 3-4 hours to manufacture, whereas LOLE'S Olive Oil Soaps are cooked in cauldrons "The True Soap Making Method" for 3 days and sundried over 6 months. Against all economic and financial odds, we never quit producing these soaps. We believe the value of LOLE'S Sundried Olive Oil Soaps has not been realized by many consumers looking for authentic natural product to clean their hair and body.

## WHY NATURAL BAR SOAP ?

Approximately two-thirds of consumers say that seeing “contains natural ingredients” on the package is an important claim.

The most frequently cited reason to buy natural products is that they don’t contain unnecessary ingredients or chemicals, with 58% of consumers stating that as a top concern. Reasons for purchasing natural products also vary by age.

The older consumer is looking for overall health and wellness; younger consumers tend to think that natural products are better quality. In an effort to reduce plastic usage, UK consumers are turning to good old fashioned bar soap.

Last year, Kantar found\* that 44% of people are now ‘more concerned’ about single-use plastic, and 70% say they tend to shop more sustainably, using alternatives or buying less.
